Skills

- **Languages:** C++, Python, Java.
- **Frameworks:** HTML and CSS.
- **Tools/Platform:** Metasploit, BurpSuite, Wireshark, Nmap, GitHub, Ubuntu.
- **Soft Skills:** Problem-Solving, Team Player, Project Management, Patient.

Projects

SPM – Secure Password Manager: **Github** June 2025 – July 2025

- Created a Password Manager, open-source, end-to-end encrypted solution enabling individuals to protect online data and generate strong, unique passwords by using user data.
- Gained proficiency in user and group administration (**useradd**, **usermod**) and implemented fine-grained access control using Access Control Lists (ACLs) and default **umask** settings.
- Administered system services like Apache (**httpd**) using **systemctl**, managed software packages with **yum,** configured network interfaces, monitored system processes, and automated tasks using **cron** jobs.
- **Tech**: Python3

CCT – Caesar Cipher Tool**:** **Github** January 2025 – February 2025

- Created a Python-based tool to encrypt and decrypt messages using the classic Caesar cipher algorithm and implemented core encryption logic to transform plain text by shifting letters and decryption to reverse the shift.
- Designed a user-friendly interface with interactive prompts for users to input the operation, message, and shift amount.
- Ensured message integrity by handling shifts that wrap around the alphabet and preserving all non-alphabetic characters, such as spaces and symbols.
- **Tech**: Python3, Linux

Training

Linux Fundamentals – Lovely Professional University: Link June 2025 – July 2025

- Mastered core Linux command-line operations, including file and directory management, text processing with grep, sort and cut and managing file permissions using chmod
- Gained proficiency in user and group administration (**useradd**, **usermod**) and implemented fine-grained access control using Access Control Lists (ACLs) and default **umask** settings.
- Administered system services like Apache (**httpd**) using **systemctl**, managed software packages with **yum,** configured network interfaces, monitored system processes, and automated tasks using **cron** jobs.
- **Tech**: Red Hat Enterprise Linux

Certifications/Certificates

- CodeHunt – Advitiya'25, IIT Ropar: **Link** February 2025
- Capture the Flag – Advitiya'25, IIT Ropar: **Link** February 2025
- Bits and Bytes of Computer Networking, Google: **Link** September 2024

Achievements

Secured Top 5 spot in AI Fusion Hackathon, IIT Ropar February 2025
Among top 10 contestants in this hackathon

Top 25% in Hack the Box January 2026
Completed 20 rooms

Education

Lovely Professional University Punjab, India
Bachelor of Technology - Computer Science and Engineering; ***CGPA: 7.53*** *August 2023 – June 2027*

Sunbeam School Pandit Deen Dayal Upadhyay Nagar, U.P
Intermediate; ***Percentage: 77.6%*** *April' 2021 – March 2022*

Sunbeam School Pandit Deen Dayal Upadhyay Nagar, U.P
Matriculation; ***Percentage: 93.4%*** *Apri' 2019 – March 2020*
